

GENERAL TECHNICAL DATA

dimensions:

- depth: 51,5 cm
- height: 44 cm
- width: 154,5 cm

weight: 45 kg

*weight when using exotic wood

materials:

- steel: construction or stainless
- wood: domestic coniferous or exotic
- HPL

DESCRIPTION

Scandik bench is a modern city bench. Its style refers to the Scandinavian small architecture. It was designed with attention to the smallest details. Simple, minimalist construction finished with light bends and bevels, will surely fit into modern architectural arrangements: parks, streets, playgrounds, promenades, promenades, promenades, shopping malls, office buildings or stations as well as more traditional areas.

The bench is available in several colour versions. The bench structure can be made of stainless steel or carbon steel powder coated in RAL colour from our palette. The seat and backrest can be finished in domestic wood, exotic wood, HPL or the bench can be made entirely of steel. On special request, we can order any RAL paint colour and make a bench with the indicated type of wood. The bench is fixed to the ground by rawbolts.

Scandik bench is part of a larger line of urban furniture of the same name. It can be an additional module for the Scandik 19.046 Solar Station as a table seat.
